

Exercise 11 | Geospatial Data I

Max Pellert (<https://mpellert.at>)

IS 616: Large Scale Data Analysis and Visualization

Questions concerning the UN data?

**Same rules as with the last
assignment, in case of
uncertainties do look them up
again in the slides of the
Exercise of Unit 06**

- Generally, use active language for the verbal part
- Check how your file would look like if printed (print to PDF as a test)
- Zoom into your visualizations to check if you included vector graphics correctly
- **Use suitable and accessible color schemes**
- Your goal should be to create a dense, data-rich visualization that tells a story
