

Exercise 12 | Geospatial II + Outlook

Max Pellert (<https://mpellert.at>)

IS 616: Large Scale Data Analysis and Visualization

Next time

We will go through some good examples of the second hand-in assignment

That will be our last unit of the course and we will do a wrap-up

This will also help you prepare for the exam

All important things covered in the course will be repeated by me in a fast-forward way

There will be no new, additional content next time

Until next time...

Go through all of the course material so far

Note down your questions

And please, do ask them next week
